Home | Firestopping Specialists Firestopping Specialists

The United States has the highest fire losses in terms of both frequency and total losses of any modern technological society. New facilities and renovation projects need to be designed to incorporate efficient, cost-effective passive and automatic fire protection systems. These systems are effective in detecting, containing, and controlling and/or extinguishing a fire event in the early stages.

Fire Protection | WBDG - Whole Building Design Guide

ABSTRACT. HPR1000 is an advanced nuclear power plant (NPP) with the significant feature of an active and passive safety design philosophy, developed by the China National Nuclear Corporation.

Firehalt

Passive Fire Stop Products are a form of fire safety provision that remains dormant, or inert, during normal conditions but becomes active in a fire situation.

Fire Stop Products. - Passive Fire Protection Products

There are six Building Code clauses related to protecting people in and around buildings, limiting fire spread and helping firefighting and rescue. Supporting them are two Verification Methods and seven Acceptable Solutions, based on the occupant activity in all or part of a building. Each clause has an objective (see C1), and there may be specific products and determinations under each clause.
