Comprehensive NCLEX Questions Most Like The NCLEX

Mathematics in China emerged independently by the 11th century BC. The Chinese independently developed number sets including very large and negative numbers, decimals, a place value decimal system, a binary system, algebra, geometry, and trigonometry.. In the Han Dynasty, the Chinese made substantial progress on root extraction and linear algebra. The major texts from the period, The Nine ...

Chinese mathematics - Wikipedia

The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.

Read 44 answers by scientists with 50 recommendations from their colleagues to the question asked by M. Ricky Ramadhian on Sep 26, 2014

What do you consider a good standard deviation? - ResearchGate

(2003-07-26) 0 Zero is a number like any other, only more so... Zero is probably the most misunderstood number. Even the imaginary number i is probably better understood, (because it's usually introduced only to comparatively sophisticated audiences). It took humanity thousands of years to realize what a great mathematical simplification it was to have an ordinary number used to indicate ...
