The sciatic nerve descends along the posterior thigh, and divides in the lower third of the thigh into the tibial nerve and common fibular nerve as it travels towards the popliteal fossa. The tibial nerve continues on and passes through the center of the popliteal fossa and runs below the tenuous arch of the soleus muscle to the superficial and deep plantar flexors.

A skull fracture is a break in one or more of the eight bones that form the cranial portion of the skull, usually occurring as a result of blunt force trauma. If the force of the impact is excessive, the bone may fracture at or near the site of the impact and cause damage to the underlying structures within the skull such as the membranes, blood vessels, and brain.

Morphology, the debut solo exhibition by artist Stephanie Martin, explores the study of forms, shapes, and arrangement of parts of organisms in order to determine their function, development, and how they have been shaped by evolution. Here, Martin exhibits biomorphic expressionistic forms using low fire stoneware and ink drawings. The forms represent new worlds that range from a cellular level ...
