80211 Pocket Reference Guide - Will Hack For SUSHI

Example 6: Subgraphs Please note there are some quirks here, First the name of the subgraphs are important, to be visually separated they must be prefixed with cluster_ as shown below, and second only the DOT and FDP layout methods seem to support subgraphs (See the graph generation page for more information on the layout methods)

GraphViz Pocket Reference - GraphViz Examples and Tutorial

v. 1580s, "to place in a pocket" (often with implications of dishonesty), from pocket (n.). From the earliest use often figurative. Meaning "to form pockets" is from c.1600.

Pocket UT™ : Portable Ultrasonic C-Scan Imaging System

If the call to sputbackc fails, the function sets the badbit flag. Note that this may happen even if c was indeed the last character extracted from the stream (depending on the internals of the associated stream buffer object). Calling this function sets the value returned by gcount to zero. Parameters c Character to be put back. If this does not match the character at the put back position ...

In the sport of Australian rules football, each of the eighteen players in a team is assigned to a particular named position on the field of play. These positions describe both the player's main role and by implication their location on the ground. As the game has evolved, tactics and team formations have changed, and the names of the positions and the duties involved have evolved too.
