Clinical Epidemiology The Essentials Free

epidemiology [epˈɪ-deˈme-olˈo-je] the science concerned with the study of the factors determining and influencing the frequency and distribution of disease, injury, and other health-related events and their causes in a defined human population for the purpose of establishing programs to prevent and control their development and spread. Also, the ...

An estimated 1 million people worldwide die by suicide every year. It is estimated that global annual suicide fatalities could rise to over 1.5 million by 2020. Globally, suicide ranks among the three leading causes of death among those aged 15–44 years.

Epidemiology of suicide - Wikipedia

A disease is a particular abnormal condition that negatively affects the structure or function of part or all of an organism, and that is not due to any external injury. Diseases are often construed as medical conditions that are associated with specific symptoms and signs. A disease may be caused by external factors such as pathogens or by internal dysfunctions.
