(PDF) Comfort care: A framework for hospice nursing

Comfort Theory and Care Comfort Care is a nursing art that entails the process of comforting actions performed by a nurse for a patient. According to comfort theory, patients experience comfort needs in stressful health care situations. Patients and their families/support groups meet some needs but other needs remain unmet. These needs

Comfort Theory: Overall Objectives - ASPMN

Introduction. Patient experience is a fundamental indicator of healthcare quality, particularly patient-centred care [1-4]. Comfort is central to patient experience and promoting physical comfort has become a core component of patient-centred care frameworks [5, 6]. However, confining comfort to a physical dimension overlooks evidence that comfort is more than the relief of pain and physical ...
