The matrix polysaccharides of plant cell walls are diverse and variable sets of polymers influencing cell wall, tissue and organ properties. Focusing on the relatively simple parenchyma tissues of four fruits - tomato, aubergine, strawberry and apple - we have dissected cell wall matrix polysaccharide contents using sequential solubilisation and antibody-based approaches with a focus on ...

1. Introduction. Humans and wildlife are exposed to an intractably large number of different combinations of chemicals via food, water, air, consumer products, materials and goods. The possible combinations of mixtures are increased by use of inter alia pharmaceuticals, drugs, tobacco and occupational exposures. Taken together, this raises significant concerns about the impacts on public and ...

Pielke, 2018 Since 1990 the world has seen a decrease in overall and weather-related disaster losses as a proportion of global GDP. This trend has occurred even as disaster losses have increased

in absolute terms. The primary factor driving the overall increase in disaster losses is societal, mainly growth in populations and settlements at risk to the consequences of extreme events (IPCC, 2012).

Efficient renewable energy management is required for a sustainable development and electrochemical energy storage is expected to play a key role in this process in a near future. This symposium will cover the state of developments in the field of electrochemical energy storage, with a focus on novel chemistries, advanced materials and design considerations of batteries and supercapacitors for ...
