Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and ...

Many managers try to manage too many projects at one time. This problem arises because the organization lacks three things: a good understanding of its capacity to do the work, patience for the right results, and an effective conceptual framework to guide the allocation of resources across a ...

THE PROJECT MANAGEMENT PARADOX: ACHIEVING MORE BY DOING LESS

The right preparations can help an organization avert a crisis. Following the guidelines in this article is a good start. Within hours of the terrorist strike on September 11, assumptions about doing business in America and beyond were altered, perhaps irreversibly. While the rubble was being ...
