From the mid-1800s through the 1940s, the hand-crank butter churn was the most commonly used household butter churn in America. Crank churns replaced simplistic wooden dash churns. It wasn't long before crank churns were replaced by electric churns. Soon after that commercial butter production became widespread. Crank

A crank sensor is an electronic device used in an internal combustion engine, both petrol and diesel, to monitor the position or rotational speed of the crankshaft. This information is used by engine management systems to control the fuel injection or the ignition system timing and other engine parameters. Before electronic crank sensors were available, the distributor would have to be manually ...
