High quality range of specimen cutting dies and sample cutter are made exactly according to the specific ASTM, DIN, ISO, or JIS standards and are highly accurate for the perfect preparation of your test specimens.

Specimen Dies / Molds | Qualitest

Specifically designed to cut test samples such as tensile bars from relatively flexible sheet the Ray-Ran Hand Operated Test Sample Cutting Press will produce samples from plastics, fabrics, boards and paper. In most cases, the thickness of the material that can be cut will not just depend on the strength of the material, but also on the lateral flexibility of the material to allow the cutter ...

Polymer Testing Services Our Labs Offer A Wide Range of Testing and Analysis on Polymers ATS' polymer labs utilize various analytical methods to discover and verify mechanical, chemical, and thermal properties of plastic and rubber materials. These processes assist in material identification, establishing preventative maintenance plans, identifying causes of failures, and verifying product ...

SCP Waterstops are manufactured from high quality PVC and are specifically developed to seal joints in concrete structures. SCP offer an advisory/design service to specifiers on the use and application for all our Waterproofing Systems.

SCP Waterstops

Manufacturers select component materials for use in their products based on the expected performance capabilities of those chosen materials. For example, tires need to be durable enough to withstand normal driving conditions, pliable enough to deform without breaking when exposed to stress, elastic enough to snap back into shape after they have been deformed by extreme amounts of pressure, and ...

Silcor® Top Coat 50 is a single component UV protective coating, formulated specifically to enhance the durability and appearance of Silcor elastomeric liquid waterproof membranes.

SILCOR® Top Coat 50 | GCP Applied Technologies

WHERE TO USE Mapelastic Smart is used for waterproofing hydraulic projects such as channels, faces of dams, swimming pools, basins, storage tanks, etc. and balconies and terraces. Particularly suitable for waterproofing irregular surfaces.

Mapelastic Smart EUROPEAN STANDARD t

Enhanced stiffness (~108 MPa) and toughness (~8,850 J m⁻²) of pHEMA-alginate hydrogels were comparable with those of human skin.. Non-swelling behaviors of the gels were stable under in vivo conditions. • 99% cell viability over a period of 60 days was shown via live/dead assays.

Non-swellaable, cytocompatible pHEMA-alginate hydrogels ...
