Vector Mechanics for Engineers Statics and Dynamics (11th ...

Strength of materials, also called mechanics of materials, is a subject which deals with the behavior of solid objects subject to stresses and strains. The complete theory began with the consideration of the behavior of one and two dimensional members of structures, whose states of stress can be approximated as two dimensional, and was then generalized to three dimensions to develop a more ...

of ~22 mL/g. To some extent, η_{inh} normalizes the solution viscosity η for the mAb concentration c and solvent viscosity η_0 . The inherent viscosity qualitatively reflects the strength of attractive interactions that raise the viscosity, in a similar manner as for $[\eta]$. The addition of 150 mM NaCl lowered η_{inh} to 18.0 mL/g, likely indicating a weakening of attractive interactions by ...
