Exploratory Descriptive And Causal Research

Exploratory research is research conducted for a problem that has not been studied more clearly, intended to establish priorities, develop operational definitions and improve the final research design. Exploratory research helps determine the best research design, data-collection method and selection of subjects. It should draw definitive conclusions only with extreme caution.

Exploratory research - Wikipedia

I think, the antonym of an exploratory research is a formal research. Descriptive research, as many understands it is a type of formal research.

Descriptive Research: Defining Your Respondents and ...

Descriptive research can be explained as a statement of affairs as they are at present with the researcher having no control over variable. Moreover, "descriptive studies may be characterised as simply the attempt to determine, describe or identify what is, while analytical research attempts to establish why it is that way or how it came to be".
