Wood-carving examples of the first eleven centuries of CE are rare due to the fact that wood do decay easily in 1,000 years. The carved panels of the main doors of St Sabina on the Aventine Hill, Rome, are very interesting specimens of early Christian relief sculpture in wood, dating, as the dresses show, from the 5th century. The doors are made up of a large number of small square panels, each ...

Relief is a sculptural technique where the sculpted elements remain attached to a solid background of the same material. The term relief is from the Latin verb relevo, to raise. To create a sculpture in relief is to give the impression that the sculpted material has been raised above the background plane. What is actually performed when a relief is cut in from a flat surface of stone (relief ...
