Mechanical Systems and Signal Processing (MSSP) is an interdisciplinary journal in Mechanical, Aerospace and Civil Engineering with the purpose of reporting scientific advancements of the highest quality arising from new techniques in sensing, instrumentation, signal processing, modelling and control of dynamic systems. MSSP papers are expected to make a demonstrable original contribution to ...

1. ACM Master Article Templates: Word and LaTeX. Microsoft Word: ACM has been working hard to create a usable and accessible experience for Microsoft Word authors while adding new features to archival formats. We have completely changed our approach to the production process to achieve ACM's goal of a publication portfolio available in flexible formats with accessibility features.

In communication systems, signal processing, and electrical engineering, a signal is a function that "conveys information about the behavior or attributes of some phenomenon". In its most common usage, in electronics and telecommunication, this is a time varying voltage, current or electromagnetic wave used to carry information. A signal may also be defined as an "observable change in a ...

This project contains an overview of recent trends in deep learning based natural language processing (NLP). It covers the theoretical descriptions and implementation details behind deep learning models, such as recurrent neural networks (RNNs), convolutional neural networks (CNNs), and reinforcement learning, used to solve various NLP tasks and applications.

About. ICASSP is the world's largest and most comprehensive technical conference focused on signal processing and its applications. The 2019 conference will feature world-class presentations by internationally renowned speakers, cutting-edge session topics and provide a fantastic opportunity to network with like-minded professionals from around the world.

Item #: SCP-1107 Object Class: Safe Special Containment Procedures: Although SCP-1107 cannot be directly contained, it is important that knowledge of SCP-1107 not be released to the public. As SCP-1107 is difficult to receive, cover-up is easily accomplished by the insertion of agents into the United States' National Aeronautics and Space Administration.
