THE BOSLEY FUE: HAIR-BY-HAIR TRANSPLANTATION. Bosley's FUE (Follicular Unit Extraction) hair transplant is a proven, minimally invasive outpatient procedure in which follicular unit grafts, consisting of a small number of hair follicles, are individually removed from the genetically stronger areas of your scalp (the "donor" areas) and artistically restored to your thinning areas (the ...

FUE Hair Transplant : Bosley

Follicular unit transplantation (FUT) is the process where a superficial strip of hair-bearing tissue is removed from the donor area. This area is located around the sides and the back of the head. Dr. Reese takes the donor strip and prepares it into follicular unit grafts. These follicles are then transplanted into the thinning areas of the scalp.

Medical Hair Transplants & Aesthetics - YouTube

Follicular unit transplantation (FUT) is a hair restoration technique, also known as the strip procedure, where a patient's hair is transplanted in naturally occurring groups of 1 to 4 hairs, called follicular units. Follicular units also contain sebaceous (oil) glands, nerves, a small muscle, and occasional fine vellus hairs. In follicular unit transplantation, these small units allow the ...

Follicular unit transplantation - Wikipedia

Follicular Unit Transplantation (FUT) is the gold standard in hair transplantation. In FUT, follicular units are harvested from the back and/or sides of the scalp then implanted into balding areas. Read an overview of FUT hair transplants written by the physician who introduced FUT, Dr. Robert M. Bernstein.
