Zebra Programming Language (ZPL and ZPL II) is a page description language from Zebra Technologies.It is used primarily for labeling applications. The original ZPL was advanced to ZPL II, but a full compatibility with the older version is not given.

Zebra (programming language) - Wikipedia
You can disable spooling on a per-printer basis, so turning off the spooler for this printer will not affect any other printer. "Print any string" means that anything I send to the printer through any means will get treated by the printer as ZPL.

Send raw ZPL to Zebra printer via USB - Stack Overflow
Here is a way to make this work from command line. net use lpt3 /delete net use \\servername\printername copy F:\folder\filename.txt lpt3. What you want to happen here is the zpl file passed directly to the printer without windows rasterizing it for you.

Amazon Vendor Central and Printing ZPL Files. How Do I Do ...
2. ZPL Extensions for Simulating Colored Label Stock. You can simulate colored (or partially colored) label stock by using the non-standard ~BR ("background rectangle") and ~BI ("background image") commands.. These commands are ignored by physical printers, but Labelary will interpret them as requests to draw colored rectangles and images, respectively.

Labelary Engine Documentation
Is there a way to send ZPL (Zebra Programming Language) to a printer in .NET? I have the code to do this in Delphi, but it is not pretty and I would rather not try to recreate it in .NET as it is.

c# - .NET code to send ZPL to Zebra printers - Stack Overflow
