Ib Biology Hl Heart Rate

Describing the data on a graph is a skill in Biology. Achieving the marks in an IB exam is more difficult than it looks. Students must do exactly what the question asks and give precise details in their answers. It is important to understand the command terms. They have specific meanings in IB exams. Command terms commonly found in graph questions. Look at these examples of graphs below and try ...

9.2) Heart The heart pumps blood through the circulatory system to all the major organs of the body. Valves: In general, blood flows into the heart from a vein, goes into an atrium, then a ventricle, and out through an artery. The heart contains valves to prevent the blood flowing backwards: the right [...]

9.2) Heart - A* Biology | GCSE, IGCSE, IB, A-Level ...

The heart pumps blood to all parts of the body, and within about a minute, that blood returns to the heart to be pumped out once again. All cells of the body get their resources from the circulatory system, either directly or indirectly, depending on their proximity to blood vessels. Within the structure of the circulatory system, the heart is its center.

Actin is a family of globular multi-functional proteins that form microfilaments. It is found in essentially all eukaryotic cells (the only known exception being nematode sperm), where it may be present at a concentration of over 100 μM ; its mass is roughly 42-kDa, with a diameter of 4 to 7 nm. An actin protein is the monomeric subunit of two types of filaments in cells: microfilaments, one ...
