Implementing The Roy Adaptation Model

Roy's Adaptation Model (RAM) was developed by Sr.Callista Roy. RAM is one of the widely applied nursing models in nursing practice, education and research.

Application of Roy's adaptation model - Current Nursing

Different disciplines have attached different environmental, political, social and economic meanings to the concept of green infrastructure, with little agreement as to how it should be defined and interpreted (Wright, 2011).The search for a shared understanding is further complicated by the view that green infrastructure can alleviate a wide array of problems confronting society (i.e ...

Reconceptualizing green infrastructure for climate change ...

The significant shifts in climate variables projected for the 21st century, coupled with the observed impacts of ongoing extreme weather and climate events, ensures that adaptation to climate change is set to remain a pressing issue for urban areas over the coming decades.

Climate change and the city: Building capacity for urban ...

The economics of global warming concerns the economic aspects of global warming; this can inform policies that governments might consider in response. A number of factors make this a difficult problem from both economic and political perspectives: it is a long-term, intergenerational problem; benefits and costs are distributed unequally both within and across countries; and scientific and ...

An Essay Using Reflection Model Borton 1970 In Nursing. This is a reflective essay based on a situation encountered during my first six-week placement on an ear, nose and throat ward at a local hospital. In order that I could use this situation for my reflection the patient will be referred to as "Mr H". This is in order that his real name is protected and that confidentially maintained in ...

Solar radiation management (SRM) projects are a type of climate engineering which seek to reflect sunlight and thus reduce global warming. Proposed methods include increasing the planetary albedo, for example using stratospheric sulfate aerosols. Restorative methods have been proposed regarding the protection of natural heat reflectors like sea ice, snow and glaciers with engineering projects.

Owing to its wide (3.4 eV) and direct-tunable band gap, gallium nitride (GaN) is an excellent material platform for UV photodetectors. GaN is also stable in radiation-rich and high-temperature environments, which makes photodetectors fabricated using this material useful for in-situ flame detection and combustion monitoring.

IJEDICT aims to strengthen links between research and practice in ICT in education and development in hitherto less developed parts of the world, e.g., developing countries (especially small states), and rural and remote regions of developed countries. The emphasis is on providing a space for researchers, practitioners and theoreticians to jointly explore ideas using an eclectic mix of ...
