Energy in Indonesia describes energy and electricity production, consumption, import and export in Indonesia. In 2009 Indonesia produced oil, coal, natural gas and palm oil, utilised also as energy raw material in 2010. Renewable energy potential in Indonesia is high: solar, wind, hydro and geothermal energy. Tropical rain forests and peat land areas have extensive coal storage.

The Athabasca oil sands lie along the Athabasca River and are the largest natural bitumen deposit in the world, containing about 80% of the Alberta total, and the only one suitable for surface mining. With modern unconventional oil production technology, at least 10% of these deposits, or about 170 Gbbl ( $27 \times 10^9 \text{ m}^3$ ) are considered to be economically recoverable, making Canada's total ...

We fight for a greener, more peaceful world. This announcement from Trader Joe's is a step in the right direction — the retailer has committed to stop offering single-use carryout bags nationwide, replace its produce bags with biodegradable and compostable options, replace Styrofoam trays used in packaging, and sell more loose produce rather than wrapping it in plastic.
