### **Introduction To Linear Regression Analysis**

Linear regression analysis is the most widely used of all statistical techniques: it is the study of linear, additive relationships between variables. Let  $Y$  denote the “dependent” variable whose values you wish to predict, and let  $X_1, \dots, X_k$  denote the “independent” variables from which you wish to predict it, with the value of variable  $X_i$  in period  $t$  (or in row  $t$  of the data set ...
