3. Summary: They don't. People rarely read Web pages word by word; instead, they scan the page, picking out individual words and sentences. In research on how people read websites we found that 79 percent of our test users always scanned any new page they came across; only 16 percent read word-by-word. (Update: a newer study found that users read email newsletters even more abruptly than they ...

8. Summary: Eyetracking research shows that people scan webpages and phone screens in various patterns, one of them being the shape of the letter F. Eleven years after discovering this pattern, we revisit what it means today. Among NN/g's contributions to the world of UX, perhaps one of the most cited is the F-shaped reading pattern for web content, which we identified in 2006.
