Joint Structure And Function PPT | Xpowerpoint

The knee joint is a synovial joint which connects the femur (thigh bone), the longest bone in the body, to the tibia (shin bone). There are two main joints in the knee: 1) the tibiofemoral joint where the tibia meet the femur 2) the patellofemoral joint where the kneecap (or patella) meets the femur.

Knee Anatomy, Function and Common Problems

The Ankle TIBIA Tibia Talus Fibula The ankle joint or "talocrural joint" is a synovial hinge joint that is made up of the articulation of 3 bones. The 3 bones are the

The shoulder has a wider and more varied range of motion than any other joint in the body. Our shoulder allows us to do everything from paint to play basketball, but this flexibility also makes the shoulder joint more prone to injury.

Shoulder Structure, Function and Common Problems

Articular Capsule of the Knee Joint. The knee is an amazing joint. The knee can bend, flex, and rotate which allows a person to stand up, walk their dog, play sports with friends, and sit down.

Articular Capsule of the Knee Joint: Definition & Function ...

An expansion joint or movement joint is an assembly designed to safely absorb the temperature-induced expansion and contraction of construction materials, to absorb vibration, to hold parts together, or to allow movement due to ground settlement or earthquakes. They are commonly found between sections of buildings, bridges, sidewalks, railway tracks, piping systems, ships, and other structures.

7. Skeletal System: Bone Structure and Function For the next two chapters (7 and 9) we will study the skeletal system. Although the major feature of this system is the bones, the skeletal system also consists of cartilage, ligaments, tendons, and other structures that hold the bones together and stabilize them.

7. Skeletal System: Bone Structure and Function

Help maintain your pet's joint, cartilage and connective tissue structure and function with Grizzly Joint Aid! Joint Support + Absorption. Joint Aid combines five powerful joint ingredients with wild Antarctic krill oil to support effective absorption.

The sacroiliac joint (simply called the SI joint) is the joint connection between the spine and the pelvis. It is a large diarthrodial joint[1] made up of the sacrum and the two innominates of the pelvis. Each innominate is formed by the fusion of the three bones of the pelvis: the ilium, ischium, and pubic bone.[2]

MID 1 Author: Frank Lowy Bacterial Classification, Structure and Function Introduction The purpose of this lecture is to introduce you to terminology used in microbiology.

Bacterial Classification, Structure and Function

A myofibril (also known as a muscle fibril) is a basic rod-like unit of a muscle cell. Muscles are composed of tubular cells called myocytes, known as muscle fibers in striated muscle, and these cells in turn contain many chains of myofibrils. They are created during embryonic development in a process known as myogenesis.. Myofibrils are composed of long proteins including actin, myosin, and ...
