Laboratory Physics

internal pages Laboratory of Atomic and Solid State Physics (LASSP) phone: 607-255-9684 | fax: 607-255-6428 511 Clark Hall, 142 Sciences Drive, Cornell University, Ithaca, NY 14853-2501

Cornell Laboratory of Atomic and Solid State Physics

The Johns Hopkins University Applied Physics Laboratory, commonly known as simply the Applied Physics Laboratory, or APL, located in Howard County, Maryland, near Laurel and Columbia, is a not-for-profit, university-affiliated research center (or UARC) employing over 6,000 people. The Lab serves as a technical resource for the Department of Defense, NASA, and other government agencies.

Applied Physics Laboratory - Wikipedia

LASP scientists spent the first hours of 2019 in a Maryland operations center watching NASA's New Horizons spacecraft shoot past a minor planet more than 4 billion miles from Earth—the farthest object that any spacecraft has ever explored.

Rock Physics Laboratory. As a public, research-oriented facility, RPL supports the research efforts of the oil and gas industry by conducting research in rock physics and by providing analytical and evaluation services.

Rock Physics Laboratory - Dept. of Earth & Atmospheric ...

The mission of the Physics Division is to understand the origin, evolution and structure of baryonic matter in the universe - the matter that makes up stars, planets and human life itself.

Argonne Physics Division

Electroceramics Research Group. H. L. Tuller and S. R. Bishop, Ann. Rev. Mater. Res. 41, 369 (2011) Electro-chemo-mechanics represents a key focus of research in the Tuller Group

Crystal Physics and Electroceramics Laboratory

About us. The Johns Hopkins Applied Physics Laboratory (APL) is a not-for-profit, university-affiliated research center (UARC) that solves complex research, engineering, and analytical problems ...

The Johns Hopkins University Applied Physics Laboratory ...

PML is a world leader in the science of measurement. We determine the definitive methods for nearly every kind of measurement employed in commerce and research, provide NIST-traceable calibrations, and disseminate standards and best practices throughout the nation. At the same time, PML works...

Physical Measurement Laboratory | NIST

A paper published recently in the journal Renewable Energy details the flow conditions around a full-scale hydrokinetic river turbine. The technologies and methods used to quantify the river's energy budget under real flow conditions with and without the turbine are important to understanding the project's environmental impacts and benefits.

Position Announcement: Division Director, High Energy Physics. Argonne National Laboratory invites applications from highly qualified candidates for the position of Director of the High Energy Physics Division (HEP), one of five Divisions within Argonne's Physical Sciences and Engineering Directorate.

High Energy Physics | Argonne National Laboratory

HEPL, founded in 1947 as Stanford's first Independent Laboratory, provides facilities and administrative structure enabling faculty to do research that spans across the boundaries of a single department or school—for example: physics & engineering or physics & biology/medicine.

HEPL at Stanford University

The National Physical Laboratory was established in 1900 at Bushy House "to bring scientific knowledge to bear practically upon our everyday industrial and commercial life". It grew to fill a large selection of buildings on the Teddington site. NPL procured a large state-of-the-art laboratory under a Private Finance Initiative contract in 1998. The construction, which was being undertaken by ...

National Physical Laboratory (United Kingdom) - Wikipedia

The New Horizons spacecraft launched on January 19, 2006 – beginning its odyssey to Pluto and the Kuiper Belt. New Horizons now continues on its unparalleled journey of exploration with the close flyby of a Kuiper Belt object called 2014 MU69 – nicknamed Ultima Thule – on January 1, 2019.

New Horizons: Beyond Pluto

Science is different than other subjects. It is not just the subject of science that is different; the entire process of doing science is different. The means by which knowledge is acquired is different in science than it is in history or mathematics or poetry or Science is different because ...

Welcome to the WIS Plasma Laboratory! In the Plasma Laboratory, we study processes in plasmas subjected to high energy deposition. We examine the interaction of non-equilibrium plasmas with strong electric and magnetic fields, the propagation of ionization fronts, the production of fast particle beams, generation of magnetic shocks, development of collective fluctuating fields, and plasma ...
