### **Lachman And Lieberman The Theory**

Degree of polymerization (DP), i.e., the number of glucose units (C<sub>6</sub>H<sub>10</sub>O<sub>5</sub>)<sub>n</sub> in the cellulose chain, exponentially decreases as a function of hydrolysis conditions, which include temperature, acid concentration and time. The rate of hydrolysis slows to a certain level-off degree of polymerization (LODP).

The Carr index (also: Carr's index or Carr's Compressibility Index) is an indication of the compressibility of a powder. It is named after the scientist Ralph J. Carr, Jr. The Carr index is calculated by the formula  $\frac{V_0 - V_1}{V_0}$ , where  $V_0$  is the volume that a given mass of powder would occupy if let settled freely, and  $V_1$  is the volume of the same mass of powder would occupy after "tapping down".

The Indian Journal of Pharmacology (ISSN 0253-7613) is an official publication of the Indian Pharmacological Society. The first issue of the journal came out in 1969 and in 1997 it was published Bimonthly. IJP publishes original research articles, reviews, research letters and correspondences.

In the manufacture of pharmaceuticals, encapsulation refers to a range of dosage forms—techniques used to enclose medicines—in a relatively stable shell known as a capsule, allowing them to, for example, be taken orally or be used as suppositories. The two main types of capsules are: Hard-shelled capsules, which contain dry, powdered ingredients or miniature pellets made by e.g. processes ...

Durante el análisis por producto se mantuvieron constante 2 parámetros y se varió solo uno cuando fue necesario, teniendo en cuenta que las presiones de alimentación y micronización deben diferenciarse entre sí en 1 a 1,5 unidades y que entre los valores de velocidad de alimentación y masa de la muestra a micronizar debe existir una diferencia de 30. 7 En la tabla 2 se muestran las ...

INTRODUCTION: The theory and techniques of fluidization have been known for many years. Fluidized bed technique has been used in pharmaceutical industry for drying, coating, and recently granulating. Wurster (1959) first described granulation in the fluid bed.

ABSTRACT. The aim of present study was to formulate and evaluate probiotic tablets containing anti-inflammatory drug Mesalazine. Matrix tablets were prepared using Sodium alginate and Hydroxypropylmethylcellulose acetate succinate (HPMCAS) as matrix forming components, with three different combinations by wet granulation method.

ABSTRACT. The main objective of the study was to enhance the dissolution of nifedipine, a poorly water soluble drug by betacyclodextrin complexation and to study the effect of the preparation method on the in vitro dissolution profile. The stoichiometric ratio determined by phase solubility analysis for inclusion complexation of nifedipine with  $\beta$ -cyclodextrin was 1:1.

For the laser diffraction method, limits of D10, D50, and D90 are often used as the acceptance criteria. These parameters refer to the cumulative size distribution which describes how many percentages of samples are below a certain size of particles.
