Manufacturing Technology And Formulations Hand

laroslav Neliubov/shutterstock.com The process, equipment, and technology for developing and manufacturing oral solid-dosage forms are well defined. Nonetheless, designing a drug product formulation that achieves the desired properties of the target profile both in magnitude and robustness is a multi-dimensional, and generally, constrained optimization problem, observes Aaron Goodwin ...

Designing Optimized Formulations | Pharmaceutical Technology

PharmaCircle is an innovative knowledge management company specializing in the drug delivery, pharmaceutical and biotechnology fields. The current clients of PharmaCircle™ vary from world leaders to start up companies in the pharmaceutical, biotechnology and drug delivery fields.

SpeedMixer Technology Top 12 Benefits of a SpeedMixer: Highly Reproducible Results – Perfect mixing every time thanks to precision centrifugal mixing in a precision machine. No Bubbles – Mixing and deaeration achieved simultaneously thanks to DAC (dual asymmetric centrifugal) technology. Deairing and degassing while mixing made easy.

SpeedMixer Technology | FlackTek Inc.

The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials (oil, natural gas, air, water, metals, and minerals) into more than 70,000 different products. The plastics industry contains some overlap, as most chemical companies produce plastic as well as other chemicals. ...

Chemical industry - Wikipedia

Additive manufacturing (AM) is fundamentally different from traditional formative or subtractive manufacturing in that it is the closest to the ‘bottom up’ manufacturing where a structure can be built into its designed shape using a ‘layer-by-layer’ approach rather than casting or forming by technologies such as forging or machining.

Additive manufacturing: scientific and technological ...

Blow-fill-seal (BFS) provides a sterile solution for aseptic technology by reducing human intervention in the fill/finish process. FDA’s guidance for the industry, Sterile Drug Products Produced by Aseptic Processing--Current Good Manufacturing Practice, defines BFS as “an automated process by which containers are formed, filled and sealed in a continuous operation” (1).

Examining Blow-Fill-Seal Technology for Aseptic Processes ...
