Messier Astrophotography Reference

The True Color of the Pleiades Nebulosity by Roger N. Clark The true color of the Pleiades nebulosity, in M45, is shown to be deep blue, and best described as a deep-high altitude daytime sky blue.

M45 Pleiades Nebulosity true color, Clarkvision.com

Nearly everything astronomers know about stars, galaxies, and the universe comes from observing light. Light is a unique phenomenon—nothing else is quite like light. We will explore how Einstein's discoveries revealed the true nature of light, and what astronomers learn from light's gravitational lensing, redshifts, and atomic fingerprints.

It's not just a big telescope. It's a big telescope that goes anywhere. New LightBridge truss-dobs from Meade take down and set up quickly. So you can take one of these massive windows on the universe out to your favorite dark sky locations with ease.

Stellar-Vision Astronomy & Science Shop

Amateur astronomy can be a rewarding and fascinating hobby. All you really need to explore the universe is a dark sky and a little patience. However, if you want to get a little more serious with astronomy as a hobby, this astronomy equipment guide will help familiarize you with some of the equipment and accessories that are available, including telescopes, telescope mounts, eyepieces, filters ...

Astronomy Equipment Guide - Astronomy Reference Guide on ...

Amateur astronomy is a hobby where participants enjoy observing or imaging celestial objects in the sky using the unaided eye, binoculars, or telescopes. Even though scientific research may not be their primary goal, some amateur astronomers make contributions in doing citizen science, such as by monitoring variable stars, double stars sunspots, or occultations of stars by the Moon or asteroids ...

Crater chains are unusual features composed of linear rows of small craters. One of the best examples is Catena Davy, "Davy Chain" (left) C| G9, which extends some 50 km and contains over 20 craterlets, most with diameters under 2 km. It was probably created by near simultaneous multiple impacts, similar to the Shoemaker-Levy-9 comet impact on Jupiter in 1994.

This website is the main online repository for unofficial information on Vixen's Sphinx mount with Star Book. Although by no means exhaustive, I have attempted to draw together many of the frequently asked questions and the generally agreed solutions.

Vixen Star Book FAQ - Online with Peter Enzerink

Taurus (Latin for "the Bull") is one of the constellations of the zodiac, which means it is crossed by the plane of the ecliptic. Taurus is a large and prominent constellation in the northern hemisphere's winter sky. It is one of the oldest constellations, dating back to at least the Early Bronze Age when it marked the location of the Sun during the spring equinox.

Taurus (constellation) - Wikipedia

Few things are as awe-inspiring as being out under a clear night sky, looking up, and gazing at a seemingly infinite array of stars overhead. So we gathered 10 telescopes, and after five months of star parties we think the Celestron NexStar 5SE is the best telescope for a curious amateur. It gathers enough light for you to view the best features of our solar system, and it gives you enough ...
