NFPA 1936: Standard on Powered Rescue Tools

The outlined testing process in NFPA 1936 is for each particular piece of equipment such as spreaders, rams, cutters, and combination tools. The manufacturer supplies sample products to undergo third-party testing that must meet or exceed the minimum specifications outlined in the document to label the product as NFPA 1936 compliant.

NFPA 1936 - Fire Rescue

5 Facts You Should Know About NFPA 1936 FACT Number 1 - Safety. One of the reasons the NFPA 1936 standard for rescue tools was created was to give fire departments the ability to compare different brands of rescue tools on a tested performance basis. The tests were the same for all brands of tools, and carried out by a 3rd party testing agency.
