Pavement Analysis

For pavement design purpose, the stress/ strain value of a pavement structure is obtained from structural analysis of the pavement (Ioannides et al. 1998). The stress/ strain values at any point of a pavement structure can be estimated when the elastic moduli, Poisson's ratio and the thicknesses of the individual layers are known.

Basic concept of pavement analysis and design - NPTEL

This chapter provides an introduction to pavement analysis and design . It covers five major sections : historical development, pavement types, road tests, design factors, and the differences between highway pavements and airport pavements and between high - way pavements and railroad trackbeds . The three major road tests constitute an impor -
