Clyde William Tombaugh (/ ˈ t ɒ m b ə ʊ /; February 4, 1906 - January 17, 1997) was an American astronomer. He discovered Pluto in 1930, the first object to be discovered in what would later be identified as the Kuiper belt. At the time of discovery, Pluto was considered a planet but was later controversially reclassified as a dwarf planet in 2006. Tombaugh also discovered many asteroids.

It's a moment that could define the future, but the name "Ultima Thule" is one from the past. The otherworldly designation, an ancient term for a distant and cold mythological land, was used by the Nazi Party and has since been appropriated by groups on the so-called "alt-right," Newsweek reported in March.

Near-future space science fiction almost by definition has the same shared background of a large human presence in space. Practically no SF stories are about the deep space adventures of an automated space probe, they are mostly about astronauts (with or without the Right Stuff) traveling to other planets and doing things. This got started in the early 1940's, since back in that innocent age ...
