Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends. A commonplace example might be estimation of some variable of interest at some specified future date. Prediction is a similar, but more general term. Both might refer to formal statistical methods employing time series, cross-sectional or longitudinal data, or ...

The expansion of our wealth is only possible so long as the oil supply continues to expand, says oil expert Dr. Colin Campbell. The financial and investment community is beginning to accept the reality of Peak Oil, which ends the First Half of the Age of Oil, during which banks created capital by lending more than they had on deposit, being confident that tomorrow's expansion, fueled by cheap ...
