### **Quantum Shankar Solutions**

R. Shankar: Principles of Quantum Mechanics Here are my notes and solutions to various problems in R. Shankar's textbook Principles of Quantum Mechanics, Second Edition. Obviously I can't offer any guarantee that all the solutions are actually correct, but I've given them my best shot.

Personally I think Griffiths is the clearest writer, and the best quantum book to start with. After that I think reading Shankar will help fill in some of the formalism that Griffiths leaves out; Griffiths really boils down the concepts, sometimes too much, so reading Shankar can give a different, clarifying perspective. I worked through every problem in that Shankar book, which I thought was a wonderful book. I found solutions to a large majority of the problems simply by googling "shankar quantum mechanics homework solutions", or similar things along those lines.

Solutions for R. Shankar: Principles of Quantum Mechanics I got this book in my 3rd year of uni when a certain QM course was destroying my life. It seems to strike a good middle ground between being too mathematically simplified (Griffiths) and incomprehensible for beginners (pretty much every other text I tried to read back then).

I just checked out the 1980 version of Shankar's "Principles of Quantum Mechanics" from the library and started reading it after reading many rave reviews on Amazon. In the prelude, on page xviii, he says "The answer to each exercise is given either with the exercise or at the end of the book." This ...

I can say from personal experience that reading Shankar is a fantastic way to self-study quantum mechanics.[1] he just gives a great intuition for the subject, whereas Griffiths tends to pull fast ones on you left and right. It's also a lot of work. Make sure you have the time to immerse yourself into it.
