You have a body that works really hard to keep you alive and breathing. Think of all the stuff you just expect your body to do throughout the day. There are tons of tiny little things that happen every single moment of the day you probably do not even think about that helps you survive. This unit will be a general overview of how your body works and what the parts are.

Geology of the Sea Floor Educational Videos | WatchKnowLearn

Earthquakes and Volcanoes - The Earth's crust is constantly moving throughout the world. It moves in some places more often than in other places. The Earth's crust moves when blocks of the earth abruptly slip past one another. This results in an Earthquake. Earthquakes are related to cracks in the crust called faults. Faults may have formed from an earlier earthquake or while an earthquake is ...
