**Scottish Fold Cats**

Scottish Fold. The Scottish Fold is a breed of domestic cat with a natural dominant-gene mutation that affects cartilage throughout the body, causing the ears to "fold," bending forward and down towards the front of the head, which gives the cat what is often described as an "owl-like" appearance. Originally called lop-eared...

Scottish Fold Cat Breed Traits. The fold in the ear can become less pronounced when the cat is in heat, upset, or ill. Although some Fold owners report an increased production of wax buildup in their cats' ears, apparently the folded ears do not make the cat more susceptible to mites or infections.

Characteristics of the Scottish Fold. Single Fold: A fold at the cartilage forms a letter V with an acute angle. The ears are folded, but not close to the head and still visible. Such cats can be raised for breeding. To create next generations of double or triple fold, these cats are bred with Scottish Straights.

The British Veterinary Association has warned breeding of Scottish fold cats should stop because of health fears. The breed has had a surge of popularity after celebrity owners such as Taylor Swift and Ed Sheeran posted photos on Instagram. The cats, which originated in Scotland in the 1960s, are famous for their small floppy ears.
