Structured Decision Making And Child

NCCD's Structured Decision Making ® (SDM) model is a suite of assessment instruments that promote safety and well-being for those most at risk—from children in the foster care system to vulnerable adults. The first SDM ® systems were developed in child welfare and juvenile justice, and the approach has been expanded to foster care, adult protection, and welfare-to-work through NCCD's ...

Structured Decision Making. Every year in California, child welfare services (CWS) agencies receive thousands of reports alleging abuse and/or neglect of children.

Structured Decision Making - CDSS Public Site

The Structured Decision Making ® (SDM) model for child protection assists agencies and workers in meeting their goals to promote the ongoing safety and well-being of children. This evidence- and research-based system identifies the key points in the life of a child welfare case and uses structured assessments to improve the consistency and validity of each decision.

Decision intelligence is an engineering discipline that augments data science with theory from social science, decision theory, and managerial science. Its application provides a framework for best practices in organizational decision-making and processes for applying machine learning at scale. The basic idea is that decisions are based on our understanding of how actions lead to outcomes.

Decision Intelligence - Wikipedia

Drawing upon its members, Chatham House aims to promote debate on significant developments in international affairs and policy responses. Their independent research and analysis on global, regional and country-specific challenges is intended to offer new ideas to decision makers on how these could best be tackled from the near to the long term.

Chatham House - Wikipedia

Using data from two culturally distinct locales, Bangladesh and Ghana, we investigate whether men and women who report sole decision making in a particular domain experience stronger (or weaker) feelings of autonomous motivation—measured using the Relative Autonomy Index (RAI)—compared to those who report joint decision making.

A safety assessment is the systematic collection of information on threatening family conditions and current, significant, and clearly observable threats to the safety of the child or youth.

Safety and Risk Assessment - Child Welfare

Comprehension is the understanding and interpretation of what is read. To be able to accurately understand written material, children need to be able to (1) decode what they read; (2) make connections between what they read and what they already know; and (3) think deeply about what they have read.
