In his quest to save the world's big fish, aquatic ecologist Zeb Hogan has wrangled what's currently the world's biggest known freshwater species.

### **Monster Fish - National Geographic Channel - Asia**

How Are Sharks Different From Other Types Of Fish? Sharks, on the other hand, belong to an entirely different group called Class Chondrichthyes (which oddly enough are thought to have evolved from an earlier group of bony fish). Some newer classification schemes instead refer to this as Class Elasmobranchii. Mostly these are marine fish, meaning that they live in salt water.

This super-sized "Goldfish" is considered to be one of the largest of its kind ever captured. Raphael Biagini spent 6 years hunting for the legendary "Giant Goldfish" in the south of France and it took him another 10 minutes to get this behemoth Orange Koi Carp out of the water. The only problem with this bizarre catch is finding a toilet big enough to flush it down when it dies...
