In FY16-18, the World Bank contributed to providing more than 47 million people with access to an improved water source and provided more than 24 million people with access to improved sanitation facilities. Below are some specific results from the World Bank-supported projects in countries.

### **Water Overview - worldbank.org**

Water scarcity is the lack of fresh water resources to meet water demand. It affects every continent and was listed in 2019 by the World Economic Forum as one of the largest global risks in terms of potential impact over the next decade. It is manifested by partial or no satisfaction of expressed demand, economic competition for water quantity or quality, disputes between users, irreversible ...
